“Everything that irritates us about others can lead us to an understanding of ourselves.”
Carl Gustav Jung

Understanding a child’s needs is the foundation of teaching and parenting. Children have physical needs but they also have social needs. They need friends and family and they need to see love and be loved. They also need to have their curiosity fostered, to discover the world for herself or himself. Finally, we as parents need to help children develop self-awareness and the capacity for success. Understanding these different aspects of development will help us raise healthy children.

Grade 5/6 Biogeoscience Institute

On June 2 – 4, 2010 the grade 5/6 class went to a science camp in Kananaskis Country called the Biogeoscience Institute. We stayed for two nights and two and a half days. We went with students from Vulcan Prairieview school. Throughout the whole experience we went on six hikes. We even did some bushwhacking. The water that we drank was from a real underground spring. This camp was once a prisoner of war camp during WWII and we learned some very interesting facts about that. We were taught so many things about trees and forests, including how to identify common Alberta trees. Did you know that all pine cones are not called “pine” cones? Some of them are spruce cones. We did a scavenger hunt with GPS units, played a

land auction game and learned about glaciers. We even got to see layers of rock flour from all the glaciers. We had a terrific time and were really tired by the time we got home.

Grade 3/4 Spaceport Field Trip

On June 3 the grade 3/4 class went on a field trip to the Calgary Spaceport. While there, the students learned about life aboard the International Spacestation - including eating, sleeping and using the bathroom in space. The students also got to build a machine that would help to establish communities on a newly discovered icy cold planet. Next, they built rockets and launched them using alka-seltzer. Finally, each student got to test out a simulator ride! Next time you're in the Calgary Airport, a trip to the Spaceport is well worth your time!
